

Daisy Chain

Cosmic Competition

Aliens could someday send us their **robots**,
robots much better than **ours**.

Ours are getting smarter than we **are**.

Are we ready for another robot **invasion**?

Invasion into our already multi-use A.I. **forces**

forces us to think what makes us **humans**.

Humans seem to be losing our evolutionary **edge**.

Edge out our competition with new **species-**
species of robots, cyborgs, androids and *aliens*.

Daisy Chain

1. The first word and the last word must be the same. (Aliens-aliens)
2. The last word of the line becomes the first word of the next line. robots-robots, ours-ours, are-are, invasion-invasion, forces-forces, humans-humans, edge-edge, species-species.
