Inventing the Cosmos

Multiverses exist
whether math or physics prove
theories by formulas or cosmic laws.

Philosophers insist
speculations also move
breakthrough thoughts to new realms, figure out flaws.

Writers and poets muse
with their creativity.
They imagine the unseen, unknown- seesaw

intuition and fuse
magic, serendipity
try many to conceive. They're outlaws.

Kerf: Three line stanzas- tercets. Marie Adams creator.
12 lines made of 4 tercets. Syllable count: 6-7-10.
Rhyme scheme: a-b-c a-b-c d-e-c d-e-c
