

Tritina

Orphan Planets

Billions of planets drift alone.
The galaxy's full of orphans.
Ejected planets litter space

From their birth in space
lonely and distant from stars, move alone
from their planetary systems, orphans.

Do we like these planet orphans
and exo-planets discovered in space
feel alone like orphans in cosmic space?

Alone? Seeking orphans to share galactic space?

The Welcomers

Decorating my mini-museum each season
brings miniatures and mini-creatures
with myriad shapes and splashes of color.

Turkeys, pumpkins, Pilgrims, Indians in autumn color.
Spooky ghostly, bewitching folk each Halloween season.
Santas reindeer, creches, angels—mostly spiritual creatures.

Joined by troops of spritely faery/elfish creatures
valentines, fireworks, shamrocks add touches of color.
Bunnies. chicks, eggs brighten the Easter season

Whatever the season mythical creatures welcome with color.

Tritina: 10 lines. Pattern ends using same end words.

1st stanza a-b-c 2nd stanza c-a-b 3rd stanza b-c-a

Last line: Take the words from 1st stanza the a-b-c and use in that order in that order in last line.
